# Universal Manual
How to work with color OTF fonts

- First of all make sure your Photoshop is **CC 2017** and higher, and your Illustrator is **CC 2018** and higher,

- Install the Color OTF Font as any other usual font.

- Open Adobe Illustrator (the tool you can effectively edit the color fonts), select Color OTF and type your text as it shown on next screen.

Select Color OTF Font

Type your text:

Right Click on YourText
and select "Create Outlines"

Press this button to recolor
all selected letters (as group)

in case you need to edit colors
of eacj letter separately go to page 7

Now your text object
became usual artwork
we can edit:

Recolor Artwork

Change color
by double click

or here:

Change color after double click

Usefull way to copy colors to another cels:

Or you can change the colors manually by selecting the shapes with this tool

you can edit colors & gradients
after selecting the needed shape

double-click

Please feel free to ask questions
or write us your ideas on fonts
