

Disco Rendezvous: An Adaptive Font Pair Inspired by Club Culture

Combining an elegant script and a tall sans serif font, Disco Rendezvous is a perfectly contrasted design that evokes the golden-age of disco, inspired by neon soaked night clubs and epic dance floor hits.

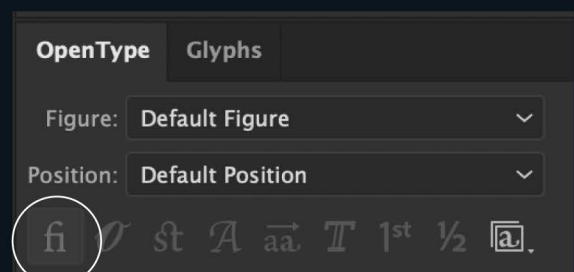

The superstar of this show is the highly customisable script that takes full advantage of OpenType features to offer countless creative options via alternative characters and automatic ligatures, giving your headers and title designs an authentically hand-made look.

It features a complete set of uppercase and lowercase characters, along with numerals, punctuation and language support, and used with the included Sans Serif font pair you have a perfectly matched type treatment.
